EDUCATION

- **Master of Computer Applications (MCA)** 2026
COER University, Roorkee, Uttarakhand
- **Bachelor of Science (B.Sc.) in Mathematics & Physics** 2024
Bareilly College, Bareilly, Uttar Pradesh

TECHNICAL SKILLS

- **Languages:** Python (Advanced), Flask, C++ (Intermediate), JavaScript (Basic), HTML, CSS, SQL
- **Machine Learning & NLP :**
 - **Models:** Regression, Classification, Recurrent Neural Networks (RNN)
 - **ML Libraries:** Pandas, NumPy, Matplotlib, Scikit-learn, NLTK, SpaCy, TensorFlow
 - **NLP Techniques:** Tokenization, Lemmatization, TF-IDF
 - **Word Embeddings:** Word2Vec, Skip-Grams, Glove, BERT
- **Tools & Databases:** MySQL (Proficient), MongoDB (Basic) , Jupyter Notebook
- **Data Analytics:** Exploratory Data Analysis (EDA), Data Cleaning, Data Visualization
- **Soft Skills:** Analytical Thinking, Problem Solving, Team Collaboration, Time Management

PROJECTS

Crop Recommendation System | April 2025

[Github](#)

Technologies: Python, Machine Learning, Flask, HTML, CSS, JavaScript

- Developed a Smart Farming application that recommends crops based on *soil type, rainfall, temperature, and climate* using *Machine Learning* algorithms.

Cryptocurrency Sentiment & Market-Risk Analysis | July 2025

[Github](#)

Technologies: Python, Numpy, Pandas, Matplotlib, Scikit-Learn

- **Engineered a Fear-&Greed sentiment label** by binning a proprietary *prediction-confidence* metric into four market-mood classes—*Extreme Fear, Fear, Greed, Extreme Greed*—yielding a clear, practitioner-friendly risk indicator.
- **Built and tuned a Decision Tree Classifier (Gini-criterion)** that predicts the four sentiment classes with **72% test accuracy** using **10+ market** and **sentiment** features; visualized decision paths to explain model logic for non-technical stakeholders.

Real-Time Face Detection Web App | July 2025

[Github](#)

Technologies: Python, OpenCV, Flask, HTML, CSS, JavaScript

- Built a *Flask-based web application* with *OpenCV* for real-time face detection using *Haar Cascade classifiers*.
- Designed a responsive front-end (*HTML, CSS, JavaScript*) with seamless webcam video streaming and efficient frame rendering.

Foundational Machine Learning Projects (YHILLS EDUTECH INTERNSHIP) | Jun-Aug 2025

[Github](#)

Technologies: Python, Machine Learning, Flask, HTML, CSS, JavaScript

- **Iris Flower Classification :** Deployed a Decision Tree Classifier for Iris species with 99.8% accuracy, using Scikit-learn for training and evaluation.
- **House Price Prediction :** Developed a Linear Regression model to predict house prices, validated with R^2 (68%) and MSE after data cleaning and feature engineering.
- **Titanic Survival Prediction :** Created a Logistic Regression model to predict Titanic survival, using One-Hot Encoding and evaluating with 78.77%.
- **Handwritten Digit Recognition :** Implemented a high-precision Random Forest model for MNIST digit recognition using pixel value normalization and achieved 97.78% accuracy.
- **Movie Recommendation System :** Designed a content-based movie recommender using TF-IDF and Cosine Similarity to generate top-5 movie suggestions.

EXPERIENCE

Data Analyst Intern

Cognifyz Technologies – Remote | **June 2025 – July 2025**

[Github](#)

- Visualized Restaurant Data using Python(matplotlib), identifying top customer preferences and cuisine trends, informing data-driven decisions regarding new menu items and targeted marketing campaigns.

Machine Learning and AI Intern

CodeAlpha – Remote | **July 2025 – August 2025**

[Github](#)

- Completed a Machine Learning internship at CodeAlpha, developing models for credit scoring, emotion recognition, handwritten character recognition, and disease prediction using Python, Scikit-learn, and TensorFlow.
- Implemented real-time object detection and tracking using OpenCV, YOLO/Faster R-CNN, and SORT/Deep SORT, enabling video-based object recognition with labeled tracking IDs.

CERTIFICATIONS & WORKSHOPS

- Web Development Workshop – COER University | Nov 2024
- Hackathon 5.0 (Smart Farming Advisor) – COER University | Mar 2024
- Trending Full-Stack Technologies Seminar – COER University | Mar 2025
- Solutions Architecture Job Simulation – AMAZON AWS , FORAGE | July 2025
